SUMMARY

B.Tech CSE student (CGPA 8.58/10) with a full-stack Python project with GPU features and NVIDIA CoE training in deep learning, generative AI, and computer vision. Seeking Software Engineering and AI/ML internships.

TECHNICAL SKILLS

Programming: C, C++, Java, JavaScript, Python (basic)

AI/ML & GPU (project use and training exposure): Machine Learning, Deep Learning, PyTorch, TensorFlow, Computer Vision (OpenCV, YOLOv8), Generative AI & LLMs (Hugging Face, LoRA/PEFT, Stable Diffusion), NVIDIA GPU computing, CUDA, GPU benchmarking and telemetry

Web & Databases: HTML, CSS, PHP, React, Streamlit; SQL, MySQL, SQLite, DBMS fundamentals

Computer Science: Data Structures and Algorithms, Analysis of Algorithms, Operating Systems, Computer Networks, Unix and Shell Programming

Tools: Git, GitHub, VS Code, Jupyter Notebook, pytest, Kubernetes (exposure)

EXPERIENCE

AI/ML Intern / Student Trainee 1 June 2026 – 12 June 2026

NVIDIA Accelerated AI Center of Excellence (CoE), Presidency University (student training program)

- Trained in machine learning, deep learning, transformer architectures, and parameter-efficient fine-tuning (LoRA/PEFT) with PyTorch, TensorFlow, and Hugging Face.
- Covered computer vision and object detection with OpenCV and YOLOv8, and image generation workflows with Stable Diffusion.
- Introduced to GPU computing and optimization on NVIDIA GPUs; tools covered included Jupyter Notebook, Kubernetes, and Antigravity IDE.

PROJECTS

IntelliPrint Nexus – Smart Printing Management System GitHub | Demo

Full-Stack Developer & AI/GPU Implementation *Python, Streamlit, SQLite, CUDA, PyTorch, pytest, Git*

- Designed and developed a Streamlit and SQLite application with separate student and administrator dashboards for print-job submission, tracking, and queue management.
- Implemented payment and refund workflows with status-based refund rules, plus administrative queue management and analytics.
- Implemented GPU detection and CUDA-based features with CPU fallback, plus GPU benchmarking, profiling, and telemetry monitoring; added pytest tests and reproducibility documentation.

Smart Office Safety Monitoring System (In Development) Arduino UNO, GPS, GSM

- Developing an Arduino UNO emergency alert system (GPS, GSM, I2C LCD, buzzer, push button) intended to send a location SMS on button press, show the alert on a security-room LCD, and sound a buzzer.

EDUCATION

Bachelor of Technology, Computer Science Engineering – CGPA: 8.58/10.0 2024 – 2028
Presidency University, Bengaluru, Karnataka

Pre-University (Karnataka Board) – 81% 2024
M.E.S. Chaitanya PU College, Sirsi, Karnataka

Secondary Education (Karnataka Board) – 95% 2022
Shri Raj Rajeshwari English Medium High School, Manchikeri, Karnataka

PARTICIPATION

Student Development Program (SDP), "Teenpreneur and His 20+ Year's Journey" – Certificate of Participation, Presidency University, Bengaluru, 28 March 2025
